

Microbiological Testing

When producers need accuracy, precision, quality and efficiency in microbiological testing, they trust the scientists of Cherney Microbiological. Our reliable results are the direct outcome of solid science, industry knowledge and the performance, commitment and competence of a highly skilled technical staff.

We detect and enumerate pathogenic microorganisms from all types of products utilizing approved methods from governing bodies such as:

- FDA – US Food and Drug Administration
- AOAC – Association of Analytical Communities
- ISO – International Organization for Standardization
- USP – United States Pharmacopeia

Our customers range all over the industry spectrum including dairy, meat, fish, vegetable, dry ingredients, drinking water, wastewater, industrial cleaning products, nonwovens, pulp paper, cosmetics, pharmaceuticals and more. This diversification allows Cherney to apply the best practices from one industry to another, providing better service and results.

Highly qualified technicians and scientists work on each project to determine customer objectives, ensure rapid problem solving and provide accurate and timely test results. Our scientists understand each customer's specific and sometimes unique needs or specifications in microbiological testing and we pride ourselves on going above and beyond where our competitors do not to meet our customers' expectations. Find that hard to believe? Ask us for our extensive list of customer referrals willing to provide testimonials regarding their service experiences with Cherney.

Our services include the detection and enumeration of pathogenic microorganisms such as: *Bacillus cereus*, *E. coli* 0157:H7, *Listeria monocytogenes*, *Pseudomonas aeruginosa*, *Salmonella* species, *Staphylococcus aureus* and *Enterobacter sakazakii*.

We also offer routine testing for spoilage and indicator organisms including: aerobic and anaerobic plate counts, aerobic and anaerobic spore counts, coliforms, *Enterococcus*, Enterobacteriaceae, *E. coli*, lactic acid bacteria, psychrophiles, thermophiles, yeast and mold.

No matter what type of product you produce or what type of results you are looking for, we can put our scientific knowledge and experience to work for you to ensure the highest quality standards are met. Find out how Cherney Microbiological Services can provide "A Culture of Outstanding Service" by contacting 920-406-8300 or Email TestWithUs@CherneyMicro.com.
