

Cherney Microbiological Services, Ltd.

ENVIRONMENTAL MONITORING AND SANITATION ESSENTIALS

WHO

Quality, laboratory, sanitation and operations managers and personnel who are responsible for or involved in environmental monitoring and sanitation.

WHAT

With a focus on practical application, this interactive course provides an overview of environmental monitoring and sanitation to develop or enhance these facility control programs. Bring facility diagrams, procedures and open issues to obtain maximum benefit from the course.

- Food Microbiology
- Environmental Monitoring Principles and Program Design
- Sampling and Aseptic Technique
- Sanitation Principles and Program Design
- Sanitary Design
- Pathogen Prevention and Control

WHY

- Discuss industry best practices
- Receive feedback on your facility's programs
- Implement risk based and proactive programs
- Increase knowledge to solve problems and support food safety objectives
- With Sanitation expert guest presenter Scott Sprangers
